### About the End-Point Assessment

Adult Care Workers are the frontline staff who help adults with care and support needs to achieve their personal goals and live as independently and safely as possible, enabling them to have control and choice in their lives. To work in care is to make a positive difference to someone's life when they are faced with physical, practical, social, emotional or intellectual challenges.

Adult Care Workers need to have the right values and behaviours developing competences and skills to provide high quality compassionate care and support.
